OVERVIEW

- Guide to implementing a Bayesian training program for research professionals within institutions.
- Freely available under Creative Commons CC BY-NC.

INNOVATION

The Bayesian Training Guide for biostatisticians was developed by the University of Michigan Applied Biostatistical Sciences (ABS) Network and Michigan Institute for Clinical & Health Research. In this guide, MICHR maps a template for providing high quality Bayesian training to replicate at other institutions. This guide outlines the need for Bayesian training and includes examples of learning outcomes, session topics, institutional supports, and coursework recommendations to build a solid Bayesian training program.
