## OVERVIEW

Collaborative storyboarding tool with customizable graphics

- Create lesson storyboards and lesson maps
- LTI integration with Canvas

## BACKGROUND

LessonDepict is a collaborative online storyboarding tool designed specifically to create lesson storyboards and lesson maps. It has a dedicated library of graphics that users can arrange and customize on the canvas to create storyboard frames. Users can also work collaboratively in storyboards that may include a single or multiple related storylines. Related storylines can be visualized in the form of lesson maps, revealing alternative storylines. LessonDepict is integrated with Canvas via LTI.

## ADDITIONAL DETAILS

We offer 3 licensing tiers. Please contact Tina Suntres - [tsuntres@umich.edu](mailto:tsuntres@umich.edu) to learn more. After you purchase the license, you will get an email with a link to access your purchase confirmation.

Please visit the [LessonDepict login page](#) and enter this link to create a new account or renew your existing account.
