

Mouse Models for Developmental Biology Research (Pax2tm1.1Gdr)

TECHNOLOGY NUMBER: 2015-487

INNOVATION

This Pax2Egfp knock-in/knockout strain has its Pax2 gene disrupted by an inserted EGFP sequence. These mice may be useful in applications related to the study of the developing intermediate mesoderm (kidney) and male/female urogenital epithelial structures, renal coloboma syndrome, and renal-specific stem cells.
